*All reject water is
cycled back into the
fresh water tank*

Pre & Post Activated Carbon Filters - remove volatile organic chemicals (VOC), pesticides and herbicides, as well as chlorine, benzene, trihalome-thane (THM) compounds, radon, solvents and hundreds of other man-made chemicals found in tap water.

Pre Sediment Filter - rid the water of sand, dirt, debris, etc., also prolongs the life of the Activated Carbon Filter(s) by eliminating gross contaminants that would otherwise clog the activated carbon.

Reverse Osmosis Membrane - a process by which ordinary tap water is forced through a semi-permeable membrane, leaving behind up to 98% of the following unwanted inorganic containments:

- | | |
|--------------|---------------|
| Aluminum | Magnesium |
| Ammonium | Mercury |
| Arsenic | Manganese |
| Barium | Nitrate |
| Bicarbonate | Nickel |
| Bromide | Phosphate |
| Cadmium | Potassium |
| Calcium | Selenium |
| Chloride | Silicate |
| Chromate | Silver |
| Copper | SODIUM |
| Cyanide | Strontium |
| Ferrocyanide | Sulfate |
| Flouride | Sulfite |
| Iron | Thiosulfate |
| LEAD | Zinc |

Soft Water

*Does Make a Difference
Save TIME, MONEY and RESOURCES*

Time Clock or Meter Regeneration Water Softener

Infallible engineering and design, give you trustworthy operation, while economically conserving the water and salt required in the regeneration process.

Benefits of Soft Water

Homes with even slightly hard water can benefit from using a water softener. In fact, water heating efficiencies for softened water may be increased up to 29 percent when heating with gas and up to 22 percent when heating with electricity.

Other benefits include:

- Increased life expectancy and efficiency of the plumbing system due to reduced clogging from scale
- Increased life expectancy and performance of water-using appliances
- Reduced soapy residue on clothes, skin and hair
- Reduced filmy deposits on tubs and shower tiles
- Reduced scratching of bathroom fixtures and sinks
- Savings in the amount of soaps and detergents used
- Decreased spotting, white chalky deposits, of dishes, pots and pans and glassware, etc.
