

# WOULD YOU LIKE PURE & HEALTHY DRINKING WATER RIGHT AT YOUR TAP?

## High Quality Drinking Water from

## HealthPoint™ REVERSE OSMOSIS Drinking Water System Water at it's best!!!

### What is Removed from the Water

**Pre Sediment Filter** - removes large particles and sediment (sand, dirt, debris, etc.), prolongs the life of the Activated Carbon Filter(s) by eliminating gross contaminants that would otherwise clog the activated carbon.

**Pre & Post Activated Carbon Filters** - eliminates volatile organic chemicals (VOC), pesticides and herbicides, as well as chlorine, benzene, trihalome-thane (THM) compounds, radon, solvents and hundreds of other man-made chemicals found in tap water.

**Reverse Osmosis Membrane** - a process by which ordinary tap water is forced through a semi-permeable membrane, leaving behind up to 98% of the following unwanted inorganic containments:

Aluminum	Magnesium
Ammonium	Mercury
Arsenic	Manganese
Barium	Nitrate
Bicarbonate	Nickel
Bromide	Phosphate
Cadmium	Potassium
Calcium	Selenium
Chloride	Silicate
Chromate	Silver
Copper	<b>SODIUM</b>
Cyanide	Strontium
Ferrocyanide	Sulfate
Fluoride	Sulfite
Iron	Thiosulfate
<b>LEAD</b>	Zinc
