today to schedule  
an in-home quote  
(480) 497-0111**

**The better-living,  
money-saving  
option.**

## **The positive difference of Soft Water**

- **Hair and skin feel cleaner and softer.** Soft water enables soaps and shampoos to lather better, rinse more thoroughly and clean more completely.
- **Appliances last longer and work better.** Without the scale buildup of hard water, washing machines, dishwashers, water heaters, humidifiers and plumbing systems can last up to 30% longer.
- **Less time and effort to clean** by eliminating mineral deposits off sinks, showers, tubs and toilets.
- **Dishes clean up faster,** without any spotting, chalky deposits or gray film.
- **Clothes are softer, whiter and brighter.** When washed in soft water, your clothes and linens are cleaner, and last up to 33% longer.
- **70% less soap is needed** for laundry, dishes, bathing and general household cleaning.
- **Up to 29% decreased in water heating cost** and less frequent replacement on water heater elements.
